

HEART OF FLORIDA SOLID WASTE GROUP
Planning Subcommittee Conference Call
December 22, 2008

Karen Deeter, Susie Metcalfe, Terri Lowery, Mark Halleen

Focus items for Phase 2 study – Hinkley Center scope

Cities data needed for complete picture – solicit information and funding (see below)

Followup with small counties, is it worth the effort?

Impact of HB 7135

Composting is highest priority due to short deadline and County responsibility

Opportunity to cooperate now! – plan, show cost-benefit, implement

75% Recycling goal – Statewide “aspiration”

Possible revisions in 2009 legislature

Opportunity to bring in Cities, Schools to cooperative effort

League of Cities knows and has listed info for cities, but solid waste staff may

not know full impact.

Waste composition study essential to planning

FDEP online calculator works for “average” not local specifics

Need to know how much of what materials are generated from various

categories of generators (SF- Res, Multifamily Res, Institutional – including governments, Commercial, Industrial) before you plan a diversion program

Organizational options

Potential formats, legal requirements, capabilities, and characteristics

“advantages and disadvantages”

Review existing and emerging disposal technologies status

Economic analysis – watershed size for disposal options, ? priority

Local political positions – may be too soon

Set working subcommittees on (some or all) the following:

Composting

Recycling

Disposal – LF

Disposal – WTE

Landfill gas as alternate energy

Other disposal

Legislation

HHW

Collection

Education

Select one or more topics to volunteer for, provide funding that can be authorized on the staff level, discuss priorities for further study/action. Hold off on scope development until we know what aretop focus items and how much we have to spend.
