Source: Based on projections made by the University of Florida Shimberg Center for Affordable Housing using BEBR 2005 population estimates. Data are available at: www.flhousingdata.himber.ufl.edu.

Uniquely Theirs:

Hamilton County has the smallest population of the Heart of Florida counties. Hamilton owns and operates a class III landfill. Therefore, they only export around 2 tons of waste per week. They also have no restrictions regarding where the Class III waste comes from. The County expects to expand their Class III landfill providing an additional 25 years of Class III disposal capacity onsite.
